

# Lala Rente Maintenance Management Portal

**Basic Process Steps**

23 October 2025

Version 2

## Basic Maintenance Management Process (Corrective Work)

- **Raising a Notification** – Notification will be the term used to identify that there is a problem. Raising is synonymous with raising a flag which will have a unique identity. Raising will be done by the tenant. Raising can also be done by owner or vendor as well. A unique number will be generated for a notification.
- **Acknowledging the Notification** – Validation of the problem and taking action. This is done by the owner of the property.
- **Pushing to dedicated vendors** – Allocating work to the approved vendors. This push is done by the owner.
- **Vendor Response** – The vendor will respond with ffg Criteria.
  - I am Interested in the work (YES/NO)
  - Quote possible with information provided (YES/NO)
  - Call Out Required(YES/NO)
  - I can respond to call out within (Same Day, 1 to 3 days, 3 to 5 days, Next week or later. Comments]

# Basic Maintenance Management Process (Corrective Work)

- **Response of Vendor:** Owner will **ACCEPT** or **REJECT** Vendor Response. If there is REJECT chat will be activated. If ACCEPTED then the Work order will be generated.
- **Issue Work Orders** –This will be a unique number. When a work order is issued. This call out is a binding contractual agreement committing to a fee that will be paid to the vendor for coming and assessing the work. This not a PO but a commitment of payment.
- **Call Out** – Vendor will come to site based on the priority set above. Vendor will assess the work.
- **Quote** - The vendor will quote for the job. A standard template is to be developed for the vendor to quote from the APP. Quote Number is a uniquely generated number. Quote must include notification number and call out if it exists. The quote will be in ffg

# Basic Maintenance Management Process (Corrective Work)

- **Acceptance of Quote:** This is the responsibility of the Owner to Accept or Reject the quote. If Accept, then PO is generated. If REJECT then chat will be activated for clarification. Quote 2 needs to be submitted. The system is to be as such that multiple quotes can be submitted in order to amicably agree.
- **Issue of Purchase Order:** Purchase order to be issued on the last quote accepted. Purchase order needs to have the trail of numbers (notification, WO, Quote No, Purchase order no). Multiple PO's can be issued for the same Work Order. [Call Out, Deposit, Stages of Work]
- **Execute Work** – Actively resolving the problem as outlined in the quote. The registers that the work is ongoing.
- **Confirmation of Work** – The vendor goes to the app confirms which stage of the work is completed. As soon as this flag is activated, an invoice is generated. If PO is issued for Call Out, Deposit and Stages, invoices are generated for those payments.
- **Invoice Generation** – The vendor gets a notification of the invoice when a stage of confirmation is done. This invoice is the replica of the quote that is submitted. A new invoice number is generated with all the numbers from the quote. When the invoice is generated there will be an invoice reconciliation button. The vendor must press this button.

# Basic Maintenance Management Process (Corrective Work)

- **Invoice Reconciliation** – This is a task done by the vendor. The reconciliation is the same as the quote but there is another column next to 8 categories mentioned. The vendor puts in the reconciled amounts on the 8 categories. Example if the call out has been R350 and the reconciled amount is R450, the vendor punches this in and pushes to owner.
- **Invoice Review & Acceptance** – Owner receives the invoice with the reconciled amount. Chat is activated if there are discrepancies. As soon as Invoice is accepted, the app will take you to the payment .
- **Payment Portal:** Limited Information from the Invoice is pulled through from the invoice to the payment portal. [Description, Residence, Vendor, PO & Invoice]. Owner makes this payment.
- **Payment:** Vendor gets payment confirmation. There is a special identity number for the payment together with the invoice reconciling payment. There is also a trail toward the expenses of the property that is stored in the records.
- **Closing Work** – Validation of work completed, recording historical data and completion of administration. This needs to be done by both the vendor and owner. After this is done then work will be archived.
